RoboCode Academy

We are a STEM education center which offer various STEM courses to age 4 or above. With our self-designed proprietary curriculum, we aim at equipping RoboCode's students with crucial skills for the 21st century.

Job Title
STEM Course Instructor (Part-time)

Our Courses
- Teacher-student ratio 1:4 (which means each of our course instructor will handle 4 students max in a class)
- Classes are mainly conducted in Cantonese, part of them are conducted in English and Mandarin
- Teaching materials (including software interface used) are in English (our course instructor should deliver courses according to our lesson plan)

What you will experience in RoboCode Academy
- Making yourself a more "society-ready" for your future career, enhancing your communication skill and efficiency
- A great satisfaction for enabling your students to achieve a higher level
- Working with a PhD founder, who is a patent inventor, lecturer, seminar speaker as well
- And more... experience yourself =)

Skills & Requirements
We are a passionate and energetic team, come and join us if you are the same =)
- Make sure you love to play with young kids and are able to communicate with them
- We expect each of our course instructor is a well-organized person
- Visit our website (https://www.robocodeacademy.com/) and have a look in detail
- Work on a "Scratch" or "AppInventor" project and show us what you did when we meet
- With relevant teaching experience will have a higher priority
- Training will be provided

Working Location
Tsuen Wan / Kowloon Bay / Shek Mun (Shatin)
