AAC Technologies Holdings Inc.

MEMS Design Engineer

Job description

- Design and analysis of MEMS device
- Using Finite Element Analysis tools to solve problems spanning acoustic, electrostatic, mechanical and thermal domains
- Works with process and test engineers to optimize simulation and design
- Characterization of MEMS device
- Device layout

Requirement

- PhD degree in Electrical Engineering or Mechanical Engineering or Acoustic Engineering or equivalent
- Understand of operation principles of MEMS device
- Knowledge of MEMS fabrication processes
- FEA modelling skills
- MEMS device characterization experience
- MEMS layout experience

Application Method

Interested parties please send application to nicolekung@aactechnologies.com.
